PROFILE

Self-taught full-stack developer with 1,500+ hours of intensive development over 6 months, resulting in 90,000+ lines of production code. Built and launched RecipeBud iOS app (100+ TestFlight users), serving 1,000+ successful recipe imports with 100% uptime and zero crashes. Currently maintaining A-B grades in carpentry studies while coding 60+ hours/week, demonstrating exceptional learning ability and work ethic. Founder of NextGenAI AB, specializing in AI-powered solutions. Ready to leverage technical expertise and leadership skills to drive impactful projects in the technology sector.

EMPLOYMENT HISTORY

Founder & Lead Developer at NextGenAI AB (pending registration)

January 2024 — Present

- Developed and launched iOS app optimizing complete food journey for 100+ users on TestFlight.
- Engineered multi-stage solution encompassing meal planning, shopping, and cooking with AI guidance.
- Implemented advanced caching and context management for sub-100ms response times and user preference learning.
- Architected production-grade FastAPI backend achieving 100% uptime with real-time conversational AI.
- Created resilient scraping system with 99% success rate, processing 1,000+ recipes and integrating video-to-recipe conversion.

Bartender/Bar Manager at O'Learys Stockholm & Pitches AB

January 2018 — January 2020

- Managed bar operations and trained new staff, enhancing service efficiency and team dynamics
- Developed communication and performance skills in high-pressure environments
- Led teams focused on customer satisfaction and retention
- Implemented inventory management systems to optimize resource allocation
- Created training programs for new hires, improving onboarding experience
